The latest PCPO-poll prepared by Dr. Nabil Kukali revealed the following key results:

- (59.9 %) of the Palestinians oppose the dissolution of the Palestinian National Authority.
- (60.6 %) are in favor of halting the security coordination with Israel.
- (56.3 %) support the reintroduction of the Palestinian – Arab draft resolution to the United Nations Security Council.
- (46.3 %) are in favor of halting the communications with the United States, whilst (33.2 %) still oppose such a step.
- (59.2 %) evaluate the position of the UN-Secretary General as “negative”.
- (21.1 %) believe that Isaac Herzog will be the next Israeli Prime Minister.

Beit Sahour – Section of Public Relations:

The latest poll prepared by Dr. Nabil Kukali and conducted by the Palestinian Center for Public Opinion (www.pcpo.org), during the period from January 14 – February 4, 2015 covered a random sample of (1000) Palestinian respondents representing the various demographic specimens of Palestinians (18 years and above) living in the West Bank, including East Jerusalem, and Gaza Strip. It revealed that (60.6 %) of the Palestinian public support the halt of the security coordination with Israel.

Dr. Nabil Kukali, President and founder of the Palestinian Center for Public Opinion, said in a statement that the majority of the Palestinian public, around (60 %), oppose the dissolution and dismantling of the Palestinian Authority as they still hope that it would pave the way for the establishment of an independent Palestinian state and that its dissolution would lead to the loss of the international momentum to the Palestinian issue and lack of interest in creating an independent entity. Furthermore, the dissolution of the Palestinian Authority would leave a national vacuum and conduce to chaos and
lawlessness. The unemployment would rapidly rise and tens of thousands of laborers would lose their jobs in its departments and organs.

**Dr. Kukali** further stated that around (61 %) of the Palestinian public call for the halt of the security coordination with Israel. It seems that this stance came as a response to the repeated Israeli procedures, practices and transgressions such as retaining the Palestinian customs revenues and the refusal to transfer these funds to the Palestinian Authority, which are in dire need thereof. Add thereto the continuation of building settlements, halt of the peace negotiations, tightening the siege on the Gaza Strip, boosting the barriers and check-points and the continuation of the intrusions and arrests.

**Dr. Kukali** has further shown that the results of this poll indicate that the Palestinian public is convinced there are no differences between the Israeli leaders and political parties when it comes to the issue of the Palestinian state. Thus, they don’t see big differences between the still acting Prime Minister, Benjamin Netanyahu from the Likud, and Isaac Herzog from the Labor Party or even Tzipi Livni, Leader of Hatnuah ("The Movement") as they are all sworn not to reach a permanent and just solution to the Israeli-Palestinian conflict.

**Dr. Kukali** added in his comments that the majority of the Palestinians support the reintroduction of the Palestinian-Arab draft resolution to the UN Security Council for a second ballot despite of the fact that the draft resolution has been initially aborted and got only 8 votes at the UNSC. It seems that the Palestinian people are decisively determined to end the Israeli occupation of the Palestinian Territories by the beginning of 2017 and, subsequently, to establish their own state on the borders of 1967 with East Jerusalem as its capitol, Dr. Kukali said.

**Dr. Kukali** pointed out that there is a growing resentment among the Palestinians towards the US position as a result of the US vote at the UNSC against the Palestinian-Arab draft resolution, that calls for the end of the Israeli occupation of the Palestinian territories by the beginning of 2017 and its backing “shoulder to shoulder” the Israeli side to foil the Palestinian-Arab draft resolution. The Palestinian public is convinced that this can only be expected from the American administration that was always biased towards Israel to the detriment of the Palestinian rights and constants. That’s the reason why around (73 %) of the Palestinian public believe that the role the US played, and still plays, in the Palestinian-Israeli peace process is not constructive and around (46 %) of them call for the halt of communications with the United States.

**Dr. Kukali** concluded his comments saying that the publishing of this poll coincides with the 21st **anniversary of establishing the Palestinian Center for Public Opinion**, which has been founded in Beit Sahour in February 1994. **PCPO** is now one of the pioneer research centers that are acting in the Palestinian territories not only in the field of the public opinion polls, but also in the fields of economic, marketing, social, educational and health research as well as other fields.
PCPO is an independent center that has no any partisan or political preferences or inclinations and conducts public opinion researches and polling activities with utmost neutrality and professionalism. PCPO is committed to provide researchers, research centers, universities, policy makers, the Palestinian political parties, businessmen, the different media and all who are concerned about and interested in the Palestinian issues, as well as the ordinary people, with reliable data and information about the tendencies and inclinations of the Palestinian public opinion on issues and policies of general, public interest. PCPO is a member of many international, renowned associations such as the founding team of the Arab Network for Public Opinion Polls (ANPOP) with head-office in Cairo/Egypt. It is the member representing Palestine in Gallup International Association (GIA) and in the International, Independent Network for Market Researches (WIN) and is also a member of the World Association for Public Opinion Researches (WAPOR) - USA and (ESOMAR).
