Notice to users of this report

PCBS would like to indicate to users of this report that classification of households according to their positions below or above poverty line is being determined on the basis of the information revealed by households about their income. PCBS warns against using this classification as a final one. PCBS indicates also that all information related to the value of humanitarian aid is also based on the reported data.

In fact, professional determination of poverty line and poverty prevalence is usually based on detailed studies about households' consumption and expenditure over an extended period of time using special methodologies and household surveys.

Press Release

Main Findings of the Survey on the Impact of Israeli Measures on the Economic Conditions of the Palestinian Households

226 Thousands of the Palestinian households lost more than 50% of their usual income, and about 22.6% of Households in Gaza Strip Suffered from Highly Critical Living Conditions

PCBS conducted the 9th round of the survey on the impact of Israeli measures on the economic conditions of the Palestinian households. Data collection was conducted during Second Quarter 2004.

The main objective of the survey is to continue monitoring the economic conditions of the Palestinian households and their standards of living as the Israeli measures continued against the PNA and the Palestinian people. This round of the survey is based on a random sample of 3,908 households, of which 3,398 households completed the interview. The completed interviews are distributed by region as 2,228 in the West Bank and 1,170 in the Gaza Strip.

Household's income

Results indicate that the median monthly income in the Palestinian Territory has decreased from NIS 2,500 before *Alaqsas Intifada* to NIS 1,600 during 2nd Quarter 2004. This decrease varies by region, the median monthly income decreased in the West Bank from NIS 3,000 to NIS 2,000 while in the Gaza Strip it decreased from NIS 1,500 to NIS 1,200.

Results of the survey indicate that 59.7% (362,000 households) of the Palestinian households decreased their income during *Al-Aqsas Intifada*, of which 62.5% (226,000 households) lost more than 50% of their usual income during *Al-Aqsas Intifada*, while 63.3% (159,000 households) of the households decreased their income in the West Bank compared with 52.3% (67,000 households) in Gaza Strip.

The Income Sources

Results of the survey indicate that the main income source of the Palestinian households during 2nd Quarter 2004 was wages and salaries from private sector, (30.7%), followed by wages and salaries from public sector employment (19.9%) and from households projects (14.2%).

Coping Strategies

The results indicated that during year 2003, 58.2% of the households (353,000 households) in the Palestinian Territory reduced their expenditure on basic needs, 59.5% in the West Bank and 55.4% in Gaza Strip.

The results indicate also that 78.0% of the households took various coping measures during year 2003 depending on the monthly family income. This was manifested in delaying payment of bills 69.4% and reduced expenditure by 58.7%.

The survey indicates that 31.2% of the households in the West Bank can cope with the situation for more than one year, comparing with 26.8% in Gaza Strip. 22.6% of the households in Gaza Strip, and 11.7% in the West Bank suffered from highly critical living conditions.

Humanitarian aid

Results show that 21.2% of interviewed households (128,000 households) reported that they received humanitarian assistance during 2nd Quarter 2004, of which 18.2% in the West Bank and 27.2% in Gaza Strip.

On the other hand, 71.8% of the households (435,000 households) reported that they need assistance, of which 71.7% in the West Bank and 71.9% in Gaza Strip.

About 13.1% of the households receiving humanitarian aid reported that the total amount of assistance received is less than NIS 100, while 39.5% of them have received less than NIS 200, 58.2% have received less than NIS 300.

However, the frequency of providing the assistance for households, PNA institutions (including Ministry of Social Affairs) are rated highest rank at 28.8%, then comes UNRWA by 25.6%, while relatives by 14.3%, and labour union by 10.0%.

The results reveal also that 52.8% of the total assistance is provided in the form of food supplies, and 28.6% in cash.

Priority Needs of Households

The results reveal that 38.4% of households reported the need for food as top priority during 2nd Quarter 2004, while 19.9 of households reported the need for work, and 18.9% of of households expressed the need for money, and 9.0% of households expressed the need for education as their first priority, and 6.4% of households expressed the need for medicine as their first priority.

Access to Health Services

The results indicate that 45.3% of the households have access problem to health Services because of the high cost of medical treatment, 40.1% due to the Israeli closure, 38.3% of households because of military checkpoint, and 8.9% of households because of the expansion and annexation wall.

Concepts and Definitions

Closure:

A set of measures have been practiced on land by Israeli occupation during Al-Aqsa Intifada, which affected and impeded the movement of persons and goods between Palestinian governorates or between Palestinian Territory and other countries. However, Israeli closure policy (total or partial) of all boarder points was a major obstacle.

Total Income:

The total amount of money and real incomes, which is earned by households, on monthly basis, regardless of its source.

Median:

The value above and below in which half total society the fall, the 50th percentile. If there is an even number of cases, the median is the average of the two middle cases when they are sorted in ascending or descending order.

Aid:

Any cash or real humanitarian aid, regardless of the source, that are received by households; due to the deteriorating living conditions, which resulted from measures taken by Israeli occupation forces during Al-Aqsa Intifada.
